Summary

This 3D model is designed to prevent the use of USB-ports in for instance office/lab computers.

Gadgets > Computers

Tags: usb   usba   port   dustcover   ports   blocker   usbaport

With this 3D model, it is possible to prevent unauthorized use of USB sticks in office or lab environments, while simultaneously protecting the ports from dust. The model completely seals the port and can be removed with some effort.

In many cases, the USB ports can be disabled in the BIOS or disconnected on the motherboard, but that is not always the case. Hence this model.
